Re: Review for installation of Lockdry Aluminum Decking and RailingWorks Railing

Don:

As you are aware, Childress Engineering services, Inc. (CES) has provided engineering calculations on numerous projects for Flotation System, Inc. (FSI) including the Lockdry aluminum decking product and the RailingWorks railing system. In addition, we have reviewed the Lockdry and RailingWorks manufacturing material specifications along with the Certification Test report performed by Wylie Laboratories for both the decking and railing system.

Based upon the numerous calculations CES has performed for FSI and based upon review of the above documents, the Lockdry Aluminum system and the RailingWorks is found to be structurally sound and in substantial compliance with the 2006 International Building Code and the Arizona Building Code requirements as well.

If you have any questions or if we can be of further service please give us a call. We appreciate the opportunity to be of service.

Respectively Submitted,

Tony H. Childress, P.E. S.E.
